Mission Statement

"To empower Filipino businesses and the broader Asia-Pacific region with intelligent technology that scales effortlessly, so teams can focus on what truly matters — growth and innovation."

Company Values

- Reliability First — We build systems that organisations can stake their reputation on.
- Transparency — Clear pricing, clear SLAs, no hidden clauses.
- Customer-Centric Innovation — Every feature we ship is driven by real customer feedback.
- Security by Default — Security is never an afterthought.
- Malasakit (Genuine Care) — We treat every client relationship with warmth, respect, and long-term commitment.

Maintenance Window	Sat 2am–6am PHT	Sat 2am–4am PHT	By arrangement

Credits applied to next billing cycle. Does not cover third-party (AWS/GCP/Azure) or customer-induced outages.

5. Call Center Script — Q&A; Agent Guide

■ **Agent Tip:** Always use the customer's name, speak with warmth and confidence, and embody Malasakit — genuine care — in every call. Green boxes show exact agent scripts.

5.1 Call Opening & Courtesy Scripts

Standard Opening

"Thank you for calling Nueva Tech Solution! This is [Agent Name], and it is my pleasure to assist you today. May I please have your name and account number so I can pull up your details?"

When Customer Provides Name

"Thank you so much, [Customer Name]! How can I make your day better today?"

Placing Customer on Hold

"I appreciate your patience, [Customer Name]. I just need a moment to check on that for you — I'll be right back and I won't keep you long. Is it okay if I place you on a brief hold?"

Returning from Hold

"Thank you so much for your patience, [Customer Name]! I truly appreciate it. So here's what I found for you..."

When Unable to Resolve Immediately

"I completely understand how important this is to you, [Customer Name], and I want to make sure we get this resolved properly. Let me escalate this to our specialist team right away, and you will receive an update within [timeframe]. Rest assured, we will take good care of this."

Call Closing

"Is there anything else I can help you with today, [Customer Name]? ... It was truly a pleasure speaking with you! Thank you for being a valued customer of Nueva Tech Solution. Have a wonderful day and take care po!"

5.2 Billing & Account Questions

Q: How do I check my current plan and billing date?

"Of course! You can view your current plan, next billing date, and invoice history by logging into your account and going to Account Settings → Billing & Subscription. I can also read out the details for you right now if you'd like — may I confirm your account email first?"

Q: I was charged an amount I didn't expect. Can you explain my bill?

"I'm sorry to hear that caused confusion, [Customer Name] — let's sort that out together right now. Could you share the invoice date or charge amount you're referring to? Thank you. I can see that charge was for [explain]. I'll walk you through each line item so everything is clear. If you feel a charge was made in error, I can also raise a billing dispute on your behalf today."

Q: Can I upgrade or downgrade my plan?

"Absolutely! You can upgrade anytime and the new plan takes effect immediately — you'll only be charged the prorated difference. For downgrades, the change takes effect on your next billing cycle. Would you like me to walk you through the available plans?"

Q: Do you offer a discount for annual billing?

"Yes, we do! Annual billing gives you a 15% discount on Managed Cloud Services and a 20% discount on NovaSight Analytics. Would you like me to calculate your savings if you switch to annual today?"

Q: How do I cancel my subscription?

"I understand, [Customer Name], and I'm sorry to hear you're considering cancellation — may I ask if there's something specific we can improve? If you'd still like to proceed, for monthly plans the cancellation takes effect at end of the current billing period. For annual plans, refunds are available only within the first 30 days. Shall I go ahead, or would you like to speak with our Customer Success team first?"

5.3 Technical Support Questions

Q: I can't log in to my NovaSight account.

"No worries at all — let's get you back in right away! Please go to www.nuevatechsolution.ph/login, click 'Forgot Password', and enter your registered email. You should receive a reset link within 2–3 minutes. If the email doesn't arrive, check your spam folder. If you're still unable to log in, I can trigger a manual reset from my end. Could I verify your registered email and the last four digits of your account number?"

Q: My data connector shows 'Disconnected' — what do I do?

"A 'Disconnected' status usually means the connector credentials have expired — this happens every 90 days as part of our security policy. Please go to Data Sources → [Your Source Name] → Reconnect and re-enter your credentials. If it still doesn't reconnect, it could be a permissions issue on the source platform's side. I can raise a support ticket and have our technical team look into it within 4 business hours. Which would you prefer?"

Q: My dashboard is not refreshing / showing outdated data.

"By default, dashboards refresh every 30 minutes, but you can adjust this per widget by clicking the three-dot menu on the widget and selecting 'Refresh Settings.' If the issue persists after clearing your browser cache and reloading, please give me your dashboard name and I'll escalate this to our platform team right away."

Q: The AI anomaly detection feature isn't showing any alerts.

"The AI anomaly detection feature requires a minimum of 30 days of historical data to train and become active. If your account is newer than 30 days, it will activate automatically once enough data has been collected. If you've been using the platform for more than 30 days and still don't see it, I'll have our AI team verify the configuration on your account."

Q: I'm getting an error message when generating a scheduled report.

"Could you tell me the exact error message? In the meantime: first, make sure your data source is still connected and authorized; second, check that the email or Slack destination is valid under Reports → Settings → Delivery. If neither resolves it, I'll log this as a P3 support ticket and our team will follow up within one business day. Is the email on your account the best way to reach you?"

5.4 Managed Cloud Services Questions

Q: Our server seems slow / we're experiencing performance issues.

"I'm taking this very seriously, [Customer Name] — let me check your account right now. Could you confirm which environment is affected and when the degradation started? I'm going to flag this to our on-call infrastructure team immediately and assign it P2 priority, which means you'll get a response within 4 hours. I'll also send you a confirmation email with your incident ticket number. Would you like me to stay on the line while I initiate that escalation?"

Q: What happens during scheduled maintenance windows?

"For Starter plan customers, scheduled maintenance is on Saturdays from 2:00 AM to 6:00 AM PHT. For Professional customers, it's a shorter window — Saturdays 2:00 AM to 4:00 AM PHT. Enterprise customers can arrange custom windows. We always send advance notification at least 5 business days before scheduled maintenance. If you have an upcoming business-critical period, please let us know so we can plan around it."

Q: How do I submit a change request?

"For planned changes, please submit your request at least 5 business days in advance using our Change Request Form at <https://support.nuevatechsolution.ph/change-request>. For urgent changes needed within 24 hours, those are also accepted with a P2 or higher business justification. Would you like me to walk you through the form right now?"

Q: Where can I find my monthly infrastructure report?

"Your monthly infrastructure health report is emailed to the account administrator on the 1st business day of every month. You can also access past reports anytime under Account → Reports → Infrastructure Reports in your portal. If you're not receiving them, it may be going to spam — would you like me to verify the delivery email address on file?"

5.5 Onboarding & New Customer Questions

Q: I just signed up — what happens next?

"Welcome to the Nueva Tech Solution family, [Customer Name] — we're so excited to have you with us! Within 24 hours, you'll receive a Welcome Kit by email with your credentials, quick-start guides, and video walkthroughs. Within 3 business days, one of our Customer Success Managers will reach out to schedule your onboarding call — a 45-minute session where we'll make sure everything is set up perfectly for you. Is there anything specific you'd like us to prioritise?"

Q: I need training for my team on NovaSight. How do I arrange that?

"We have a dedicated course called 'Data Analytics with NovaSight' — a full-day virtual training at ■11,500 per person covering data sources, dashboards, and AI features. For 5 or more participants, you get a 10% group discount; for 11 or more, that's 20% off. We can also build a fully customized training program for your organisation. Would you like me to connect you with our training coordinator today?"

5.6 Escalation & Complaint Handling

Q: Customer is frustrated or upset

"I sincerely apologize for the inconvenience this has caused you, [Customer Name]. I completely understand your frustration, and I want you to know that your concern is very important to us. Please allow me to make this right for you. Let me look into this immediately and I will not rest until we have a clear path to resolution. Your satisfaction means everything to us at Nueva Tech Solution."

Q: Customer requests to speak with a supervisor

"Of course, [Customer Name] — I completely understand. I'll connect you with our Senior Support Lead right away. While I transfer you, may I briefly inform them of the situation so you don't have to repeat yourself? Thank you for your patience. I'm also making sure a note is added to your account so this is tracked with top priority. Please hold for just a moment — I'll stay on the line until they're with you."

Q: Issue cannot be resolved on the same call

"I want to be fully transparent with you, [Customer Name] — this requires our specialist team to investigate further, and I want it handled correctly rather than rushed. I am logging this as a [P1/P2/P3] priority ticket right now, and you'll receive a reference number by email within a few minutes. Our team will follow up with you by [specific timeframe]. May I confirm the best email and phone number to reach you?"

5.7 Frequently Asked Short Questions — Quick Reference

Customer Question	Agent Response
What are your support hours?	Standard: Mon–Fri 8am–6pm PHT. Priority: until 10pm PHT. Enterprise: 24/7.
What is your toll-free number?	1-800-10-NUEVA (63832) — available during business hours.
